

Contraindications

The contraindications are as follows:-

Pregnant women

We recommend that Callus Peel is **not** used if a client is pregnant as the hormones of pregnant women tend to be imbalanced. We suggest that you book her in for fabulous special offer Ultimate Pedicure when she has the baby and everything has calmed down.

Diabetes

We recommend that you take care, if you have a client who has Diabetes, before carrying out this treatment as you must be aware of potentially serious skin problems related to the disease. Most people who suffer from Diabetes are on controlled drugs. We do recommend that you let the client have a copy of the ingredients of the patches, which they may show to their GP, if they insist on having the Callus Peel treatment. Be very careful not to over file the feet. The ingredients of the Skin Soft Sachet and Moisture Creams are on our web site. If you require a copy to be emailed to you, kindly let me know. Some Salons have carried out the treatment on clients with Diabetes and have had no problems at all. We just want you to be aware of the risk of treating anyone with Diabetes before carrying out this treatment.

Psoriasis

If the area where the patch is to be applied is fine, then you can carry out the treatment, otherwise, if you have any doubts, do not proceed.

PLEASE MAKE SURE YOUR CLIENT IS MADE AWARE OF THE ABOVE
